Bodenmann Balz Reto

Dear attendees of the METROPOLIS Workshop,

Please find below the program for Saturday 22. Most of you come from the French team of
the SustainCity project so I plan to keep the meeting as informal as possible so that we
can address the issues relevant to the project. Balz and Thomas, if you have particular
interests that would like to see included, please tell me asap and I will adapt my
presentation.

I'll take care of organizing the lunch and will be available afterwards so that we can
keep the discussion / work on some issues.

09:30 Welcome [Fabrice]

09:45 Overview of Metropolis [Fabrice]

10:20 "Applying METROPOLIS to the Greater Paris Region in the context of Sustain City
project: First run and future challenges" [Seghir's paper presentation]

11:00 Coffee break

11:15 Interface METROPOLIS <-> Urbansim : needs for SustainCity

1) variables to export to METROPOLIS, demand specification and estimation issues relevant
for METROPOLIS [Nathalie, can you prepare a short status report?]

2) Urbansim transport python module / variables to import from METROPOLIS [Navid, can you
prepare a short status report?]

12:45 Lunch

Looking forward to see you on the 22th.

Best regards,

Fabrice Marchal
